Kliopa, G. I.
EFFECT OF SPEED ON THE FORCE OF CUTTING SOIL (Vliyanie Skorosti na Usilie Rezaniya Grunta). [1962] [14]p. (foreign text included) 2 refs.
Order from OTS or SLA $1.60 62-18743

Trans. of Stroitel'nye i Dorozhnye Mashiny (USSR) 1958 [v. 3] no. 8, p. 13-16.

DESCRIPTORS: Soils, *Cutting tools, *Graders, Velocity.

At an increase in cutting speed the coefficient of depositing the soil slice in a longitudinal direction is decreased, i.e. the soil is loosened-up to a greater extent, in which case a lower coefficient of linear depositing corresponds to a larger angle of cutting. At an increase in cutting speed the displacement of the cut soil is increased, in which case greater displacement corresponds to a larger cutting angle.
